Professional Opinions

"I am a herbalist and naturopath and have worked with patients and treated serious ailments, some incurable, for many years. I have been using the Air Light with colour filters for over one year and I am treating patients very effectively for all types of internal ailments and external injuries (burns, ulcers, open wounds, etc.)".

(W. Zimmer, Naturopath, A.D.H.S)

"I have been in practice for 30 years, and in that time I have had occasion to use many forms of clinical appliances in the pursuit of well-being for my patients. To date, nothing has reached the high standard of achievement that the GEOMED Air Light has attained. It is well designed and easy to operate. The various spectrum of light dispersed by the filters achieve the desired results as listed for their use".

(B. Morley, N.D.B.AC)

"I highly recommend the Air Light's colour therapy to support and strengthen specific organ functions and wound healing".

(L. Brownsey, Homeopath)

"I recommend that everyone who suffers from a chronic degenerative illness have regular ionised air because it will improve their general health, well being and improve all treatment outcomes.

I also highly recommend the air/light colour therapy to support and strengthen specific organ functions and wound healing. Geomed products are wonderful assets for health."

(L. Brownsey, Homeopath)

In the former Soviet Union Prof. Bulatov, over a period of thirty years, treated 3,000 asthma sufferers. He was able to affect a cure in twenty to thirty sessions.

"If you don't have enough oxygen in your body, drugs, vitamins and food are of little help. You are just playing musical chairs on the Titanic."

Dr Abraham A. Chaplan, M.D. Ph.D.

Dr. Otto Heinrich Warburg of the Berlin Institute of Cellular Biology, two times Nobel prize winner showed that oxygen and hydrogen in ionised form are the great keys to eradicating viral, bacterial, parasitical infections and the chronic (or sub acute) conditions.

"Cancer is a condition within the body where the oxidation has become so depleted that the body cells have degenerated beyond physiological control."

Dr. Wendell Hendricks, Hendricks Research Foundation

“Oxidation purifies the blood, keeping it free from cellular waste build-up. Sufficient oxygen gives the body the ability to rebuild itself and strengthen the immune system, our natural defence against disease. It also has a calming and stabilising effect on the operation of the nervous system.”

Dr Norman McVea

“Starved of oxygen, the body will become ill, and if this persists you will die. I doubt if there is any argument about that.

John Muntz, Nutritional Scientist

“The line between insufficient oxygen and disease has been firmly established. Insufficient biological energy can result in anything from mild fatigue to life-threatening disease. Simply put, the best way to optimise health is to be sure that we oxygenate every cell in our body.”

Dr. Norman McVea

“The air you breathe may be making you sick! It contains far less oxygen than the air in the early history of the Earth. Why? Auto exhaust, industrial pollution, deforestation, smoking, agricultural run off.”

Dr Abraham A. Chaplan, M.D. Ph.D.

“Physical and emotional stress rob the body of huge amounts of much needed oxygen. Any form of stress can cause oxygen deficiency. Emotional stress produces adrenaline and adrenalin-related hormones. This response reduces oxygen reserves in the body.”

Dr. John Muntz

“In all serious diseases we find a very low oxygen state. Low oxygen in the body tissues is a sure indicator of disease. Hypoxia, or lack of oxygen in the tissue, is the fundamental cause of all degenerative disease.”

Dr Stephen Muntz, renowned Molecular Biologist

Evidence that negative ions work is backed up by considerable volumes of research by numerous European, American and other scientists over many years.

I.e. USA – Prof. Kornbluh and Prof. Krieger – on hay fever, bronchial asthma, blood disorders, hormonal reaction, etc.

GERMANY – research on heart and blood circulation, migraine, asthma, bronchitis, emphysema, stress, arthritis, rheumatism, breathing and sleeping disorders, general feeling of well-being, stabilisation of the immune system and much more.

See the Internet for scientific research material.

Below are some links to web pages pertaining to scientific studies and information on various subjects from ionisation to music therapy.
